EXPERIENCE - 2.8 YEARS

1.5 Year
MFINE | Software Engineer -Reactjs Developer
JAN 2023 – Present | Hsr LayOut , Bengaluru

FRONT-END JavaScript | Reactjs | NextJs

- Developed a streamlined web application for prescription verification and item management, featuring versatile filtering options.
- Created an interface to simplify the creation of channel routes for corporate clients, reducing developer workload.
- Automated cashless payment claim creation, enhancing user experience with profile selection and status updates.
- Revamped corporate wallet page for cashless services, transactions, and FAQs.
- Developed blog posts, FAQs, featured doctors, and a contact form for a Next.js project.
- Implemented hybrid payment feature for 1mg flow integration.
- Designed a price change visualization tool for medicine items and added features for order management.
- Developed profile selection pages for B2B clients and PLP/PDP pages for medicine orders.
- Created UI for managing corporate service subscriptions and post-PD prescription ordering flow.
- Implemented cart replacement, item removal, hybrid order placement, and cart for simultaneous lab test booking at home and at a center.
- Implemented location module for easy order journey tracking.
- Worked on Livekit, a platform similar to Google Meet, for doctor and patient consultations.

1.3 Year
TATA CONSULTANCY SERVICES | Associate System Engineer
OCT. 2021 – DEC .2022 | Siruseri, Chennai

FRONT-END JavaScript | React

- Developed a product listing page, product detailed page, and implemented a persistent cart with React.js

BACK-END C++ | OOPS

- For the Delta Airlines client, we improved the functionalities related to PNR, check-in, and baggage. It's comparable to a migration project transitioning from Assembly language to C++

ACHIEVEMENTS

PROGRAMMING
Practiced 160 LeetCode and Geeks for geeks problems.
